

A diagram showing a 2x2 grid of squares. The top-left square has a blue dashed border and contains the expression  $xy$ . The top-right square has a red dashed border and contains the expression  $x - y$ . The bottom-left square has a blue solid border and contains the expression  $x^2y$ . The bottom-right square has a green dashed border and contains the expression  $x + y$ . A small black arrow points upwards from the origin (the intersection of the solid blue lines) and another small black arrow points to the right from the origin.

$$xy$$

$$x - y$$

$$x^2y$$

$$x + y$$
