

A diagram showing a 2x2 grid of squares. The top-left square is blue and contains the expression xy . The top-right square is red and contains the expression $x - y$. The bottom-left square is light blue and contains the expression x^2y . The bottom-right square is light green and contains the expression $x + y$. The squares are separated by thin black lines, and the entire grid is centered on a black coordinate system with arrows at the ends of the axes.

$$xy$$

$$x - y$$

$$x^2y$$

$$x + y$$
